# BGR Energy Systems Limited

Company Fact Sheet

BGR Energy Systems Limited is an Indian engineering and manufacturing company established in 1985 and listed on the National Stock Exchange under BGRENERGY and on the BSE under scrip code 532930. Headquartered in Chennai, the Company operates across industrial thermal management and cooling, design and engineering services, power and energy, and mobility infrastructure. It designs and manufactures air-cooled heat exchangers, process and oil and gas equipment, deaerators, and water and desalination systems, and executes turnkey power plant and balance of plant projects, substations, and transmission systems. Its project record includes marquee projects such as 660 MW Unit I of the Ghatampur thermal power station, commissioned in December 2024, and electrical and instrumentation packages at the Kudankulam, Kakrapar and Rawatbhata nuclear projects.

## Business

- **Engineering and Construction:** turnkey engineering, procurement and construction (EPC) and balance of plant solutions for thermal and gas-based power plants, power transmission and distribution, water and wastewater treatment, oil and gas facilities, and allied civil and infrastructure works.
- **Products and Capital Goods:** design and manufacture of air-cooled heat exchangers, finned tubes and process equipment for the power, refining, petrochemical and process industries, supplied in India and overseas.
- **Engineering Services:** an asset-light engineering services business offering engineering design, detailed engineering, technical documentation and project engineering support for power sector projects, serving domestic and international customers, and complementing the core EPC operations with stable service-based revenue.
- **Emerging Areas:** solutions for nuclear power projects, including electrical balance of plant and conventional island works.

## Track Record

Over four decades of operations, BGR Energy has executed power generation projects aggregating close to 14,000 MW and has supplied heat transfer equipment to installations across more than 27 countries.
